## ANNUAL SCIENTIFIC MEETING ON PEDIATRIC INFECTIOUS DISEASES 2025

# ABOUT ASMPID

Infectious diseases in children remain a leading cause of morbidity and mortality both in Indonesia and globally. The emergence of new infectious diseases (emerging infectious diseases), the re-emergence of previously controlled infections (re-emerging infectious diseases), and the high prevalence of neglected infectious diseases indicate that infectious diseases continue to be a major public health issue requiring serious attention. Moreover, global dynamics such as climate change, international mobility, environmental shifts, and increasing antimicrobial resistance significantly impacted the epidemiological patterns and management of infectious diseases in the pediatric population.

Amidst these challenges, the rapid advancement of science and health technology demands that pediatric healthcare professionals continually update their knowledge and skills. Staying informed with the latest evidence-based information on diagnosis, therapy, prevention, and health policy is essential to support child health services that are high quality, comprehensive, and responsive to ongoing changes. A multidisciplinary approach integrating science, clinical practice, and health policy has become an important foundation in addressing pediatric infectious disease challenges in this era of globalization and dynamic global shifts.

As an effort to support the strengthening of professional capacity, dissemination of up-to-date knowledge, and reinforcement of cross-sectoral collaboration, the Annual Scientific Meeting on Pediatric Infectious Disease (ASMPID) 2025 is held under the theme “Emerging and Neglected Pediatric Infectious Diseases: Bridging Knowledge, Practice, and Policy.” This Scientific event is designed to facilitate knowledge and experience exchange through diverse sessions, including symposium, general lectures, “Meet the Expert”, “Meet the Professor”, and interactive workshops covering clinical, preventive, and policy-related aspects.

The topics addressed by ASMPID 2025 include a wide range of current and relevant issues, such as dengue, malaria, rabies, HIV/AIDS, mycosis, sepsis, TORCH infections, and other tropical infectious diseases. The event also highlights strategic issues such as antimicrobial resistance, rational antibiotic use, travel medicine, and the application of the One Health approach in infectious disease management.

## ANNUAL SCIENTIFIC MEETING ON PEDIATRIC INFECTIOUS DISEASES 2025

# ABSTRACT & POSTER

### GENERAL REQUIREMENTS

1. The abstract must be an original work, which may include research studies or case reports in the fields of Infection, Tropical Diseases, or Miscellaneous Topics.
2. Submit the abstract to the committee via email at [panitia@asmpid2025.com](mailto:panitia@asmpid2025.com) no later than July 18, 2025. Abstracts submitted after this date will not be accepted.
3. Accepted abstracts will be presented in E-Poster format during the Offline Session.
4. The abstract presenter must be a registered participant and attend the ASMPID 2025 Offline Symposium

### ABSTRACT GUIDELINES

1. The abstract must be written in English using Arial font, size 11 pt, single spacing.
2. The maximum word count is 250 words, excluding the title and author names.
3. The abstract title must be written in ALL CAPITAL LETTERS.
4. Author names should be written in full, with first name followed by last name, using both uppercase and lowercase letters.
5. The first-listed author is considered the primary author. The presenter's name must be underlined.
6. Author affiliations must be written in full and in the following order: department, institution/hospital, city.
7. Avoid using:
  - Non-standard abbreviations
  - Foreign terms
  - Uncommon symbols or acronymsIf used, they must be defined at their first mention.
8. Use generic drug names. Numbers should be written in numeric form
9. The abstract must be in text-only format. Tables, charts, and diagrams are not allowed.
10. References should not be included. If they are, they will count toward the total word count

### RESEARCH ABSTRACT STRUCTURE

1. **BACKGROUND / OBJECTIVE:** Rationale and objective of the study.
2. **METHOD:** Study design and statistical analysis used.
3. **RESULTS:** State whether the hypothesis is accepted or rejected, supported by statistical data if relevant.
4. **CONCLUSION:** The implications of the results for patient management or understanding of basic disease processes.

### CASE REPORT ABSTRACT STRUCTURE

1. **BACKGROUND / OBJECTIVE:** Rationale for reporting the case, novelty, and clinical relevance.
2. **CASE:** A concise description of the case
3. **CONCLUSION:** Clinical implication, practical recommendation, awareness, or suggestion for further research
